SUMMARY

Final-year B.Tech (CSE - Data Science) student with hands-on experience building Python and machine learning applications, including an AI-powered recommendation system and a predictive risk model. Strong foundation in Python, SQL, and applied ML, with proven ability to take a project from data to a working, user-facing tool. Seeking a full-time opportunity to apply and grow these skills in a fast-paced engineering team.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, HTML & CSS, Git, GitHub

Data & ML: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, NLP, Streamlit

Core Competencies: Data Analysis, Predictive Modeling, Dashboard Development, Problem Solving

PROJECTS

FitAI Pro – AI-Powered Fitness Meal & Workout Planner

Python, Streamlit, NLP, Machine Learning

- Built an AI-powered fitness planner that generates personalized meal and workout recommendations from user inputs such as goals, diet, and activity level.
- Implemented meal image analysis and NLP-based workout tracking, alongside BMI/BMR/TDEE calculations to power personalized calorie and macronutrient targets.
- Designed an interactive Streamlit dashboard to visualize calorie balance, weight trends, and macronutrient breakdown, making progress tracking intuitive for end users.

Logistics Package Damage Risk Prediction

Python, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn

- Developed a machine learning model to predict the probability of package damage during logistics operations based on shipping-related factors.
- Generated and analyzed synthetic shipping datasets incorporating package weight, packaging type, handling quality, weather, route type, and number of transfers.
- Used exploratory data analysis and visualization (Matplotlib, Seaborn) to surface the key risk drivers behind package damage, informing feature selection for the model.

WORK EXPERIENCE

Python Developer Intern — Navayuvabharat Infotech LLP, Hyderabad

Jun 2026 – Sep 2026

- Applying core Python programming concepts to real-time software development tasks as part of a live project workflow.
- Collaborating with the development team to build and test features, strengthening practical experience in the software development lifecycle.
- Continuously expanding technical knowledge through assigned internship activities and code reviews.

EDUCATION

B.Tech, Computer Science & Engineering (Data Science)

2023 – 2027

Rajeev Gandhi Memorial College of Engineering and Technology, Nandyal

Intermediate (MPC)

2021 – 2023

L.R.G Naidu Junior College, Hindupur

Secondary School Certificate (SSC)

2020 – 2021

Sri Chaitanya English Medium High School, Anantapur

LEADERSHIP & VOLUNTEERING

Women in Tech Lead — Google Developer Groups

Sep 2024 – Mar 2025

- Led initiatives to promote participation and visibility of women in technology within the campus GDG chapter, organizing sessions and community engagement activities.
